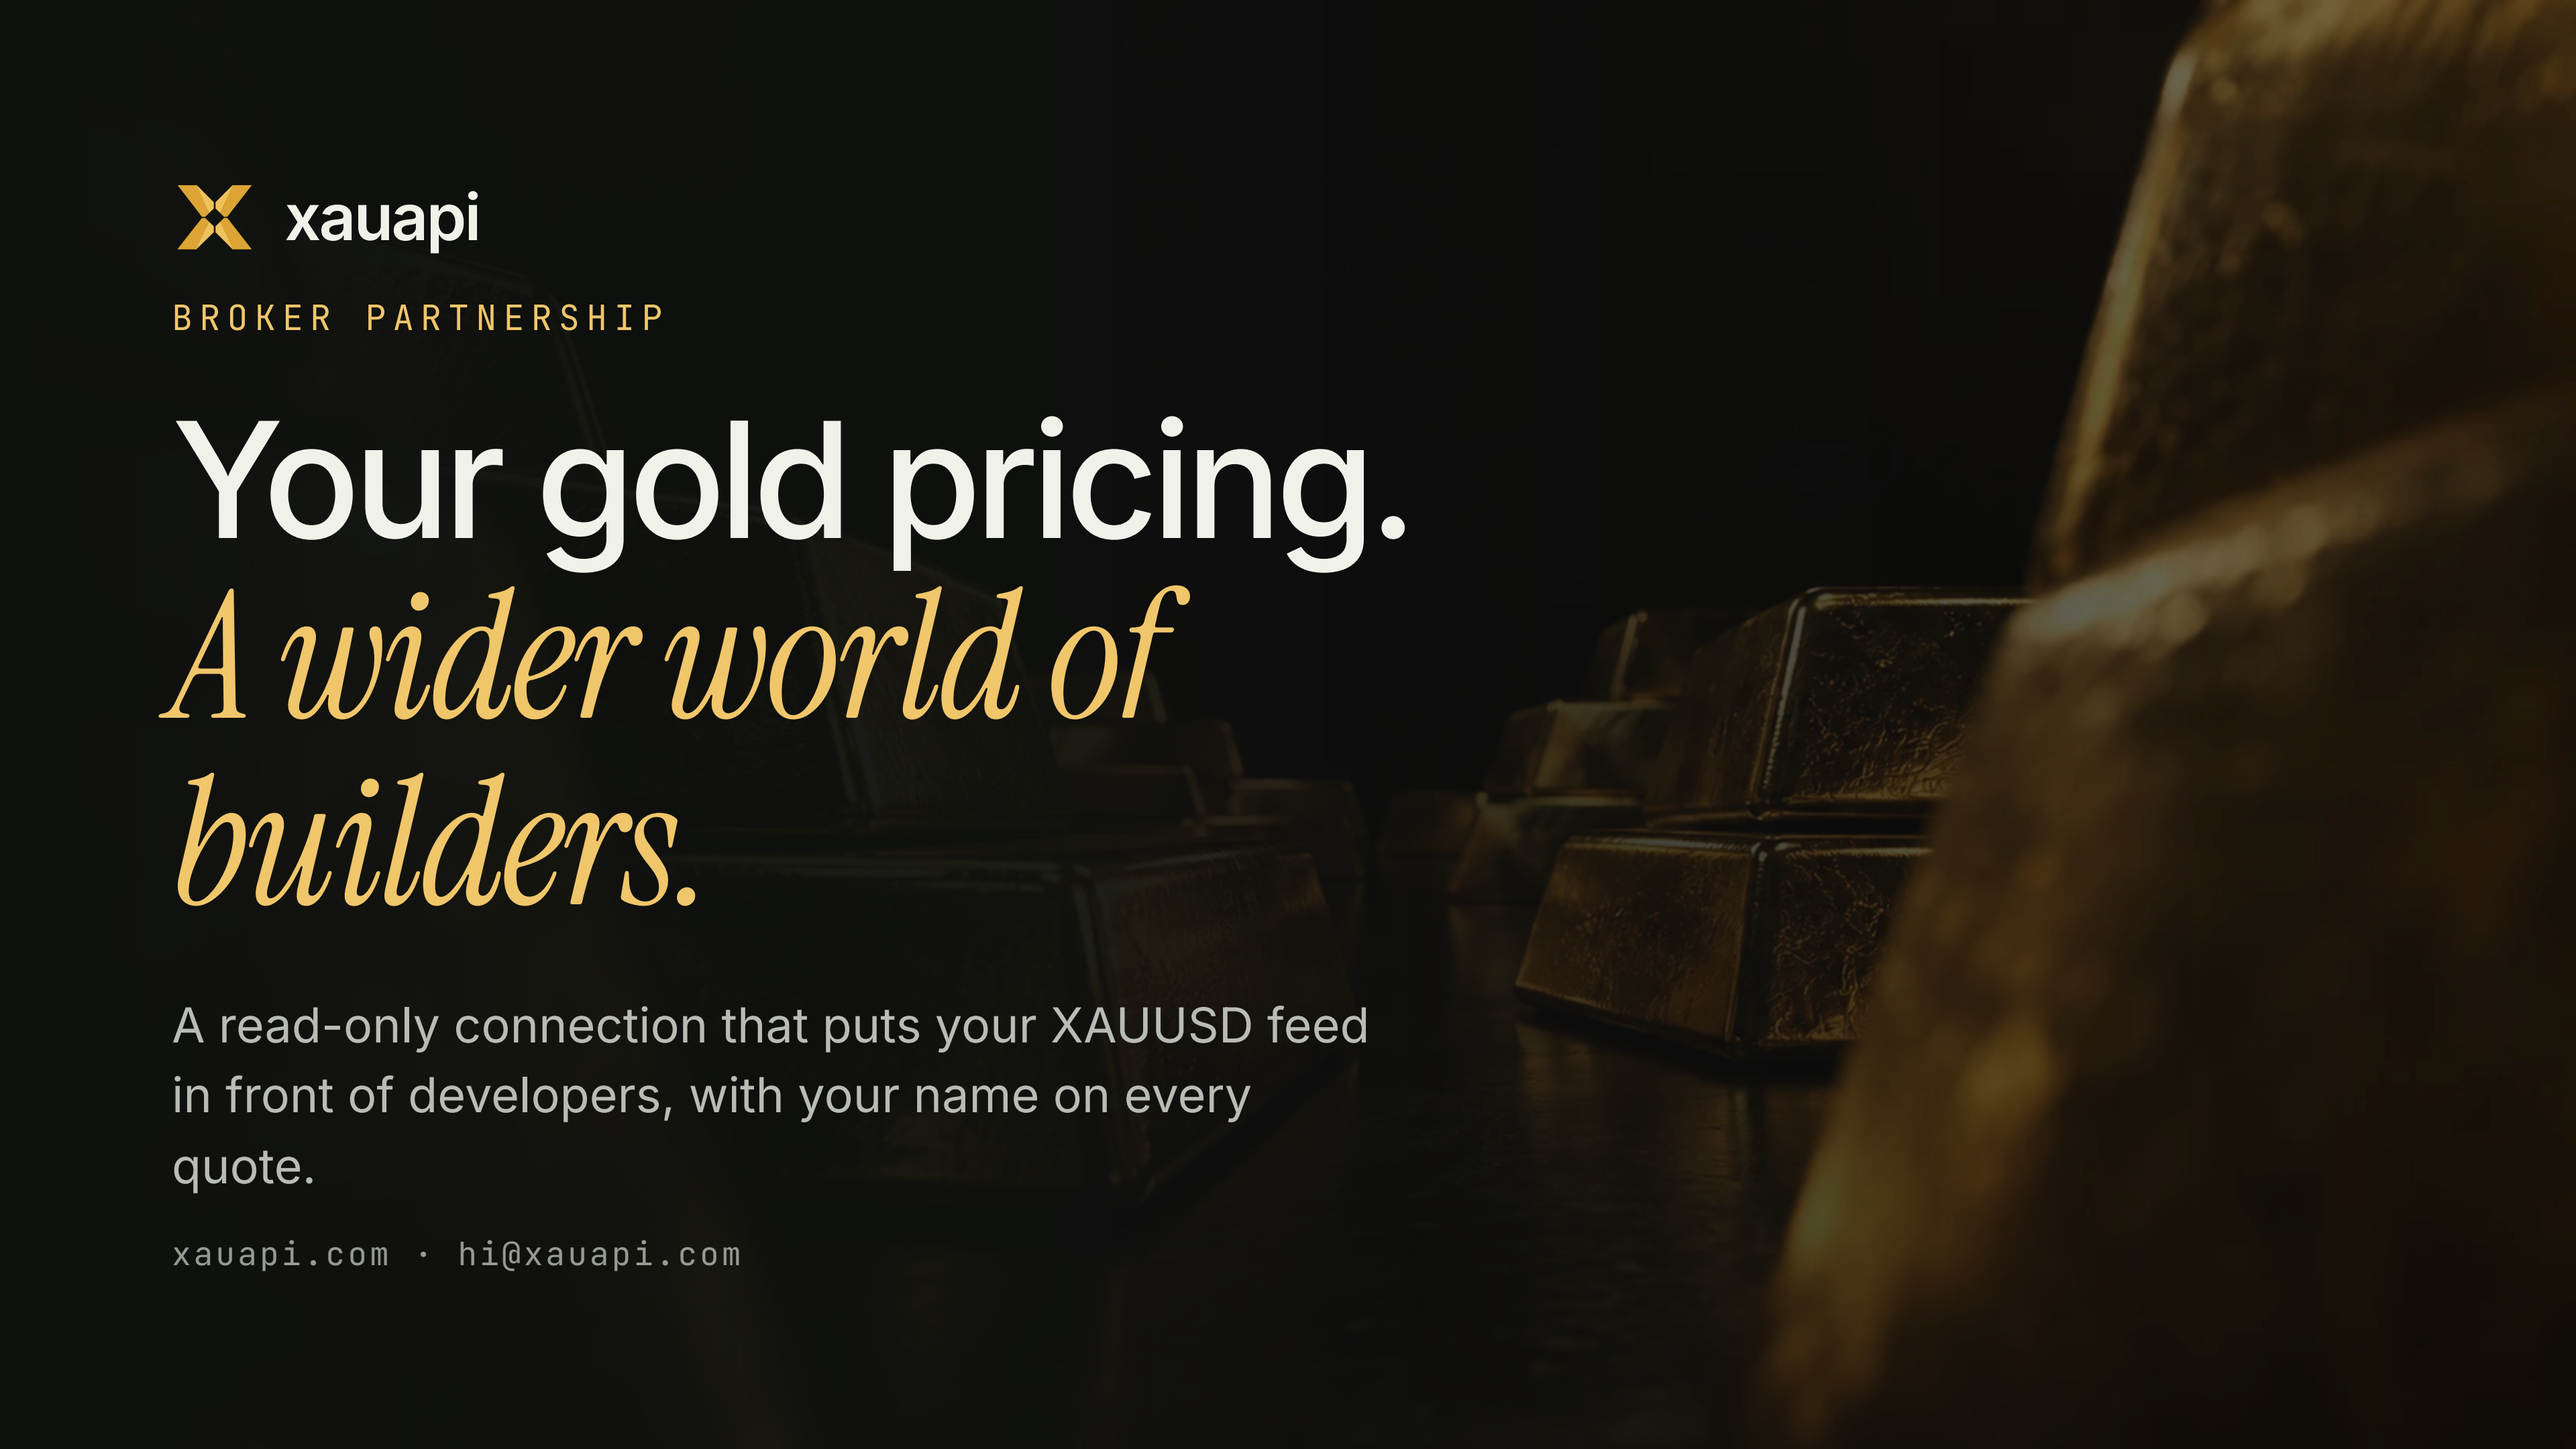
BROKER PARTNERSHIP

Your gold pricing. *A wider world of builders.*

A read-only connection that puts your XAUUSD feed in front of developers, with your name on every quote.

xauapi.com · hi@xauapi.com



THE GAP

Developers want gold data.
Getting it is still painful.

01

Terminals and servers

To read live XAUUSD prices, builders run their own MT5 terminal on a VPS and write their own bridge.

02

Anonymous prices

Aggregated feeds hide where a quote came from. Spreads and candles differ by broker, and users notice.

03

Not ready for AI

AI assistants and agents need a clean, permissioned data source they can call directly.

WHAT XAUAPI IS

One gold data layer.
Your source stays visible.

01 · SOURCE

Your broker feed

XAUUSD bid, ask and candles from your MT5 server, read-only.

xauapi

One consistent interface: REST API and read-only MCP, with keys, quotas and monitoring.

02 · BUILDERS

Developer apps

Dashboards, alerts, research tools and AI assistants.

LIVE TODAY

Not a concept.
Running in production.

~250ms
Bid / ask sampling interval from the broker terminal

3
Candle intervals: M1, M5 and M15, from broker history

1min
Feed health checks, with outage and recovery tracking

0
Trading permissions. The API cannot place, change or close orders

First feed: JustMarkets · XAUUSD · MT5

Paid plans live via Stripe

Already feeding a production gold signal app

WHO USES IT

Builders who pay *for reliable gold data.*

Market terminals

Live gold dashboards and charting tools.

Price alerts

Level, spread and session alerts for traders.

Research tools

Notebooks, backtests and session studies.

AI assistants

Agents that read gold prices through MCP.

Pro	**$149** / month · 12M requests / year
Max	**$1,490** / month · 240M requests / year

WHAT YOU GET

Your data, in more products.
With your name on it.

01	**Attribution on every quote**	Each feed is labelled with your brokerage, so developers and their users see exactly whose pricing they are looking at.
02	**A new developer channel**	Your spreads and candles reach tools that traders open every day, with no build cost on your side.
03	**No trading exposure**	Market data only. No order placement and no access to client trading accounts.

HOW THE CONNECTION WORKS

Light on your side.
We run the rest.

WHAT WE NEED FROM YOU

- Read-only MT5 access to your XAUUSD feed
- Permission to redistribute bid, ask and candles
- Attribution guidelines for your name and logo
- One technical and one commercial contact

WHAT XAUAPI HANDLES

- Read-only collector and private ingestion
- REST API, MCP, docs and developer support
- Keys, quotas, rate limits and billing
- Feed health checks and outage tracking

SAFEGUARDS

Built to protect *your brand and your clients.*

Read-only by design

No orders, no account access, no client data.

Honest freshness

Source timestamps and freshness flags on every response.

Validated first

No feed is listed as supported until its data is checked.

Controlled access

Hashed API keys, rate limits and annual quotas per account.

Monitored feed

Health checked every minute; outages are logged.

Clear independence

No endorsement implied beyond what we agree.

COMMERCIAL OPTIONS

The terms are open.
Here is where we would start.

Option	What it means	Status
Attribution	Your name and link on the feed, docs and site	Included
Referral pathway	Tracked link for users who want to open an account	Open to discuss
Co-marketing	Joint launch post, case study, developer events	Open to discuss
Data terms	Revenue share or data fee on feed usage	Open to discuss

ONBOARDING PATH

A conversation first. *Then a connection.*

01 · INTRODUCE

Meet the team

Goals, contacts and the instruments you offer.

02 · ALIGN

Agree the scope

Redistribution rights, attribution and commercial terms.

03 · VALIDATE

Test the feed

Connect read-only and check quality and availability.

04 · LAUNCH

Go live together

List your feed and announce it to developers.

NEXT STEPS

Your broker *could be next.*

1. Name a contact

Commercial and technical owners

2. Share data terms

Redistribution and attribution rules

3. Book a follow-up

Scope and validation plan
